We Attribute Our SUCCESS to the CO-OPERATION of Our Patrons

A.F. DASS.

INTRODUCTION

Another year has rolled by in spite of all the hardships and depression. We are glad to present our new 1934 Plant Guide with the prices practically the same as they were in 1933. We have cut expenses, and made savings on all overhead, in order that we may meet all competing prices and demands of our customers.

We have a full line of fine nursery stock for the coming season and hope that all of our customers will be able to purchase some of this stock for the coming season of 1934. As you know, we will have to keep on planting in order to improve our farms, as conditions will have to improve within the next year or two. We are doing all in our power to help our customers in regard to price and quality of stock.

As we have stated in our previous catalogs we have some of the finest plant land in Southern Michigan. It is a sandy loam which grows large, thrifty plants and root systems. They are also adapted to all kinds of climate as

adapted to all kinds of climate as the temperature here drops to as low as 10° below zero. That is why we recommend our plants, trees and shrubs to grow and thrive anywhere in the United States.

If it does not inconvenience you in any way, we would suggest that you order as soon as possible. If full amount cannot be paid when ordering, you may send one-third with order, and balance any time before shipping date. We are doing this so that we may be able to reserve good thrifty stock for you. It also helps us a great deal in our office and packing house. There are so many of our customers that order and want shipment at once, but there are orders that must go first as they have been booked for a long time. Then they wonder why we wait three or four days before shipping. That is why we are giving the 5% discount on all orders received before March 15th.

The Broadest Guarantee Ever Made

We guarantee every plant, tree or shrub that we ship out to be free from disease, true-to-name, and to arrive in perfect growing condition. If for any reason whatever, you are not satisfied that you have received 100 cents in value for every dollar sent us, we will adjust it to your satisfaction. Our policy of "Every Customer a Satisfied Customer" means all that it implies and we are here to give ABSOLUTE SATIS-FACTION.

Dass Nursery Co.

Never a Better Time to Grow Your Own Fruit

Have Your Own Berries and Make a Profit Besides

You are making a big mistake if you are not growing at least enough fruit for home use. Right out there in your garden, back yard or along one side of a field, Dass' plants will produce a big supply of the finest fruits that you ever ate. Nothing else can give you the satisfaction and pleasure you'll have in growing your own berries. You will not only save money, you will make money as you will find an eager demand for any surplus that you will have.

Your Family Needs Fruit

Fruit is not a luxury, it's a necessity, one of the most nourishing and healthful of all foods and enjoyed by all, whether eaten fresh from the vines, or when made into preserves, jams, jellies, pies, or the countless other tempting ways it can be prepared and served.

Provide it at Small Cost

Do you know that the money you pay for a few quarts of stale, inferior fruit will buy Strawberry, Raspberry, Blackberry and Grape plants that will give you a year around supply of delicious, high flavored, finest quality berries? You will have them just when you want them and they'll have an added attraction because they are coming right from your own vines.

No Experience Required

It doesn't require a lot of experience, petting and care to produce berries with Dass' Fruit Plants and Trees, because they are healthy, vigorous, 100% producers; in fact, it's almost impossible to keep them from fruiting. Just plant them this spring, hoe them occasionally to keep the weeds down, and next season they will show their appreciation by giving you loads of beautiful berries.

Quality Counts With Us

We are and always have been producers of the highest possible grade of nursery stock. Our soil, which lies along the lake shore, in Berrien County, has long been recognized as the very best obtainable for the culture and long-rooted growth of the various kinds of nursery stock. Our climate is just right, in that the growing season is long enough to produce large, long-rooted plants, and the winters are cold enough to give them the necessary hardiness to succeed anywhere that they can be successfully grown.

The methods employed at our nurseries are most modern. We employ all labor-saving devices and our system of handling and grading is the best.

Our price is the lowest consistent with the very best nursery stock obtainable. Our policy is liberal. It is risky to pay less and needless to pay more.

It Is Easy to Order From Dass

The express rate is one-third less than it was last year and for long distance shipping would advise your ordering by express, as it would be much cheaper. If you have an agent in your town he will advise you as to the rates and advisability of shipping via express. If your orders for cane plants are ordered before April 1st, could ship them via freight, this also would save you money, but cannot ship via freight much later than April 1st, as it gets too hot.

WHEN TO ORDER: The sooner the better, and as a special inducement to have you send your order in early we will allow a 5% discount on all orders mailed before March 15th. This discount to apply only when cash accompanies the order. It is to our mutual advantage when you order early as it relieves us of office work during the rush season, and as our stock is complete you are certain to get what you want. No orders for spring shipment should call for shipment later than May 15th, as the plants are not dormant after that date, and we cannot be responsible for their condition after shipment.

HOW TO ORDER: Use order blank enclosed and be sure to fill it in correctly. We are anxious to give you prompt, efficient service and you can aid us greatly in doing this if you will write or print your name and address plainly and give the other information called for.

OUR SHIPPING SEASON: On all nursery stock begins about March 25th and continues to about May 15th in the spring. Fall shipping season from November 1st to November 30th or later.

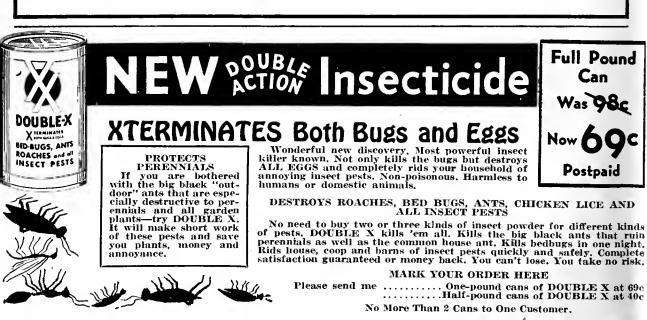

TRANSPORTATION CHARGES NOT PREPAID. Our customers order from every state in the Union, and we cannot in all fairness quote a prepaid price. If we did, those of our customers living in our own or neighboring states would have to help pay the charges for those in far distant states. We ship all packages C. O. D. for carrying charges, whether by mail or express, and you can pay the mail man or express agent when plants are delivered. Specify whether mail or express shipment is wanted, or leave it to our judgment and we will ship the cheapest way.

NO CHARGE FOR PACKING: We make no charge for wrapping and packing, which is done in the best possible manner by trusted men of long experience. Plenty of damp moss and shingle tow is used so that stock will reach you in perfect growing condition.

TERMS: Cash or one-third cash with order, balance before shipment or C. O. D. No credit shipments can be made, as our business is run on a strictly cash basis.

SUBSTITUTION: We do not substitute one variety for another without your permission, except on late orders when there is no time for correspondence. No varieties used for substitution except those listed in our catalog, and we guarantee satisfaction on varieties substituted.

IN CASE OF ERROR OR SHORTAGE: Notify us immediately as we are not satisfied until you are. As soon as you receive your order, check it over and if not correct notify us immediately, advising number of packages or crates short, accompanied by express agent's receipt for shortage if shipped via express.

Dewberries

These are a sort of blackberry, but the vines are not self supporting, as are the Blackberries. The usual method of propagation is as follows: They are set 3 feet in the row, rows 6 feet apart. Short posts are set about every fifth vine and a wire stretched about three feet from the ground. Each spring all strong vines are tied to the wire, and the ends that are too long are cut off about ten inches above wire.

LUCRETIA. This is the best variety of Dewberry that we have fruited and is one that gives universal satisfaction. Berries are very large, in fact, being larger than any blackberry grown. They are jet black, coreless, sweet and juicy. Dewberries are free from rust and all other fungous diseases. Plant at least a few for home use.

Lucretia Dewberries.

Currants

Fine for Jelly - Easy to Grow - Very Productive

The Currant is one of the most valued of small fruits. Being very hardy, they do not winterkill, are easy of cultivation, requiring little care.

PERFECTION. Cross of Fay's Prolific with White Grape and combines the best qualities of both parents. In color it is beautiful bright red and of a size larger than the Fay; the clusters average longer and the size of the berries is maintained to the end of the bunch. It is one of the most productive Currants we have ever known.

LONDON MARKET. A fine red Currant. Quality excellent with mild flavor. Bush healthy and vigorous.

Each, 15c; 10 for \$1.25; 100 for \$10.00.

We cannot ship Gooseberries and Currants after April 10th, as the law requires that they must be shipped when dormant. The State Inspector makes a spring inspection of Gooseberry and Currant plants, consequently orders should be in by April 10th to guarantee shipment. Downing Gooseberries.

Gooseberries

There's Nothing Quite Like the Pies and Preserves From Gooseberries.

Very profitable, for they are strictly for the North and require a cold climate; easy to plant and care for, and bring good returns. They require feeding, and when given a good mulch of stable manure in the late fall, will repay you well.

HOUGHTON. Small, dull reddish brown fruit, tender, juicy, sweet, and pleasant, ripening soon after midsummer. Profuse bearer.

DOWNING. Medium to large, pale green. Quality good. Upright, productive bush. Midseason. The most widely grown variety.

Each, 15c; 10 for \$1.25; 100 for \$10.00.

Perfection Currants.

Every Raspherry plant carries a certificate of Double Inspection—and our guarantee to be free from de case, true-to-name and productive. Your success is assured when you plant: this healthy, vigorous sto as you will harvest big, paying crops of first quality fruit for many years. Remember that every plant absolutely guaranteed to be free from Mosaic, Root Gall, Blue Stem, and other deadly Raspherry diseas furthermore, they will be fresh dug and shipped direct to you—there are no storage cellars on our far all stock dug and shipped fresh and guaranteed to arrive in perfect growing condition.

Red Raspberries

Red Raspberries will do equally well on light or heavy soil; however, it should be well drained. For field culture, Red Raspberries should be planted about 3 feet apart in the row, with the rows 7 feet apart, requiring about 2000 plants per acre. In the spring, all canes should be cut back to about 3 feet and branches trimmed to about 6 inches. Six or seven good strong canes are sufficient to a bush, and the berries will be higher in quality.

canes are sufficient to a bush, and the berries will be higher in quality. LATHAM. Although a comparatively new variety, it is entirely past the experimental stage, and we unhesitatingly recommend it as one of the best Raspherries ever grown. It was originated in Minnesota, and has never been known to winterkill even though exposed to 45 degrees below zero. The sensational yields of this variety have attracted the attention of growers everywhere, and everyone who has given it a trial is praising the many unusual features found in Latham. Is a trial is praising the many unusual features found in Latham. Is a trial vigorous grower; the canes are extra beavy, well able to support the tremendous load of fruit. The foliage is a healthy, dark green, tough and leathery, highly resistant to insects. Ripens about the same time as Cuthbert and covers a longer fruiting season than any other Raspherry. Color a dark, rich red; quality of the best, with full Raspherry flavor. FABLY KING Prohably the most widely grown of any red Raspherry

EARLY KING. Probably the most widely grown of any red Raspherry on the market. It comes early when prices are high and yields extra heavy crops. The berries are large, firm, a beautiful color and easily picked. The bush is strong growing and remarkably free from disease, is one of the bardiest sorts grown and can be depended on for a good crop every year.

CUTHBERT. For many years Cuthbert was the leading variety and is till grown extensively in many localities. Cuthbert is a vigorous grower and produces an enormous amount of fruit, equally desirable for home use and market. Begins bearing about ten days later than Early King, berries are large, conical, dark red, highly flavored and good quality. A good bardy sort and can be grown in any climate. grown in any climate.

CHIEF. A seedling of Latham and has turned out to be by far the finest early Red for general planting. The fruit is not quite as large as Latham but is bright red, very firm and a tremendously heavy yielder, producing 20 per cent more than Latham in the Minnesota test plots. The Chief is practically immune from mosaic and mildew and is even hardier and of better flavor than Latham. Raspherry growers bave long looked for a good early Red Raspherry. They bave tried King, Miller, Early June, etc., and although fairly good in many respects they have not been very profitable. It now looks as though the new Chief is going to meet most of the requirements and become the greatest moneymaker of them all— ripening 10 days before Latham, firmer, same good color, fine flavor and a heavy yielder.

Black Raspberries

Black Raspherries should be planted on a rather high soil for best esults. Gravelly and loamy soils are best. They are planted about 3 set in the row, rows being from 6 to 7 feet apart. The young shoots acb year are tipped or cut off when about 24 inches high, and the aterals are trimmed to about 6 or 8 inches in length the feet in the ros ollowing spring. Leave about five good, strong shoots per bush.

The New Harbert The New Harbert is a variety of black Raspberry which we are introducing for the first time last year. It is a large berry and a vigorous grower, and will produce one third more berries per acre than any other variety of black Raspberry that is grown. The canes grow upright and where the Cumberland will grow three or four canes this variety will have seven or eight, thus making the yield per acre one-third more. The New Harbert will grow on any kind of soil, and is free from all contagious diseases. We recommend planting them 4.7 feet. Hope you will try some of our new variety this coming spring, as it will be the leading variety in a year or two.

CUMBERLAND. Witbout question the most profitable and

CUMBERLAND. Witbout question the most profitable and popular black Raspberry grown; the one safe and reliable com-mercial variety, because you can depend on a big paying crop regularly. We call it the "Business Black-cap" because it succeeds everywhere—light or heavy soil—East, West, North or South —wherever you find Raspberries grown, this is the leading black variety, and it never fails to produce its customary big crop every year. It is perfectly hardy, tremendously productive, the bushes are vigorous, uprigbt, strong and healthy. Berries extra large, glossy black, not equalled by any other variety in quality, flavor and appearance. It's good to eat and good to sell.

All appearance, it's good to eat and good to sen. PLUM FARMER. Is very popular with many growers on account of its earliness, and ability to mature its customary big yield in a very short time, usually from 12 to 16 days. The plants are healthy, canes strong growers. Produces plenty of bearing wood which insures a heavy crop of fruit. The ber-ries, which are produced in clusters, are large, well colored and of first quality. Flum Farmer will give satisfaction every-where. Ripens nearly a week earlier than Cumberland and can be worked in nicely with that variety.

Harbert Raspberries.

The New Logan The most dependable early black Raspberry. Ripens one week earlier than Cumberland. Berries are extremely large, delicious, and the pickings from first to last are of uniformly higb quality. New Logan holds up well through drought, and is highly disease-resistant. Free from seediness and a tendency to crumble

The New Logan Raspberry.

Blackberries

Blackberries thrive equally well on any light of heavy soil and as they are practically immun from all disease and insects, one planting will pro-vide a big income for a number of years. Por field culture, Blackberries are usually planted 4 feet apart in the row, with the rows 7 feet apart, requiring about 1600 plants per acre. For best results they should be confined to hills, allowing only five or six strong shoots per hill. The new growth each summer should be trimmed down to about 24 inches and allowed to branch--this gives a stronger, sturdier bush. his gives a stronger, sturdier bush.

ALFRED. This Blackberry bas become a favorite for bome use and market. The fruit is of the finest quality for table use, as it is nearly seedless and coreless. The flavor is sweet and enticing. Berries grow to immense size. Ripens early, perfectly ardy, a vigorous grower.

EARLY HARVEST. Valuable because one of the earliest to ripen. Berries are of edium size, black, and of excellent quality. An enormous bearer. Flavor sweet and licious. Canes are strong, healthy, upright growers.

ELDORADO. Never winterkills and always produces a full crop of jet black berries of enormous size. The bardiest and prettiest of all Blackberries, with that delicious aroma and flavor which can only be found in a wild Blackberry. It is valuable for all purposes, both home and commercial, being so very form that it will remain in good condition for three and four days, and can be sent to distant markets where it always commands the highest price.

Transplants This season we are offering a limited supply of choice two-year Latham, Cumberland and Plum Farmer Raspberry and Eldorado Blackberry trans-plants. These are bealtby, one-year tip plants that have been lined out and of berries this summer if not cut back when planted, but for best commercial results we recommend close pruning when setting out. Order early to be sure of getting these transplants.

Planting MASTODON, The Great Everbearer

PLANT MASTODON THIS YEAR. Why plant common sorts when with Mastodon you can get three crops in the same time that you would get one with the June-bearing varieties. Our selected Mastodon bear a heavy crop the same summer planted, a crop the following spring that equals or sur-passes any of the June-bearers that we grow, and a heavy crop that following fall. Why wait a full year before getting returns?

before getting returns? A variety such as Mastodon cannot be adequater by described in words. This berry, as a common or dreds of miles in perfect condition and command the highest prices. The big green calyx of this wonder variety gives it an appearance that only Mastodon has, and these facts, coupled with the extreme large size, the tremendous bearing capacity and its valuable everbearing characteristics, readily show why you should include Mastodon in your order this year. Others of our growers are making big money on this variety, and the farmer who plants one or more acres now for a June-bearing crop should get the cream of the profits in the future. The seal of public approval is practically price-less. It endows a variety with a character which

Champion

This variety of everbearers was first introduced to the public about eight years ago. It is a variety greatly resembling the old Progressive, but has larger berries and better quality. While not as firm or large as the Mastodon, it is prized for home use, as the flavor is the finest of any Strawberry grown. Excellent for canning, fresh sauce, short-cake, etc.

Premier

grower. Premier eliminates protection in the proving five days to a week ahead any other kind, it never fails to command the highest price.

As a long distance shipper, Premier is unsurpassed. The berries are firm and will arrive at the market in fine condi-tion. A berry that will stand up and keep its fresh, firm ap-pearance for days will sell itself in any market. We recom-mend the Premier and Mastodon as being the biggest money-making Strawberries on the globe, and after you try them you will agree with us. Send your order early as we always get more orders for them than we can full and the "early bird gets the Fremier."

Harvest King

This wonderful new June-bearing Strawberry was originated in Northern Michigan, where the summers are short and late spring frosts are common, and is one of the bardiest Straw-berries known. Deep red color, delicious flavor, large size, and is superior as a canning berry, retaining its original flavor and dark red color even after cooking. Because of the many good features of Harvest King it is displacing some of the older va-rieties, both for market and home garden. Ferfect flowering, ord can be planted alone. and can be planted alone

Harv

Red Gold is a revelation in the spring variety. The berries are simply enormous in size. Color is shining red and they are full of delicious sweet-ness with that wild Strawberry flavor. Does not contain the acid found in the common kinds. Eat all you like. Meaty, tender flesh, not pithy. Re-quires less sugar to make preserves. Many use only half the ordinary amount. Stems are very strong and stout, holding the berries out of the dirt. Stems are loaded with these mammoth ber-ries. Red Gold plants make runners very freely. Root system goes down 12 to 15 inches. Pruiting season thirty days. Blakemore Is a new variety with exceptional characteristics; a cross between Prem and Missionary by the U. S. Department of Agriculture. It is a large ber conical, red all the way through, and with excellent flavor. The hull is recurve seeming to be made for easy removal. It is a prolific producer of plants is well, the fruit heing firm and better able to stand shipment than any other

> Washington Sturdy, hardy plants, vielding big crops of deep, dark glossy red berries with long keeping quality. Plavor is delicious, juice like syrup, sweet as sugar. Color is red to the very center. A recent introduction that is out-standing for its good outalities.

re. It is a large berry,

Beauty

A new berry that well merits s name. A big, juicy, sparkling ed berry of the most delicious avor. The plant which is a spark the start red berry of the most delicious flavor. The plants are thrifty growers and produce a big lot of berries. Berries are good shippers and will keep an exceptionally long time. You won't make any mistake in planting Beauty.

Gibson

Is a very strong grower, with long roots that withstand dry weather. As a drought resister, it is a wonder. It has plenty of dark green foliage to pro-tect its enormous crops of fruit from the sun. The vines are loaded with berries. You will hardly understand how the plants can produce such quan-tities of fruit. The berry is extra large and beautiful, dark glossy red. The calyx is bright green, which adds to its beauty and market value. It has a fine tart flavor, good for table use and canning purposes. This berry org-inated in Bridgman, and has held its place as the leading commercial variety for many vers. for many years.

Blakemore

Red Gold The Wonderful New Spring Variety

Cooper

Beyond question this variety yields the biggest Strawberries ever pro-duced. Its large, bushy plants are full of vigor and vitality that enable it to be grown successfully in all soils and climates. The flavor of its fruit is deli-cious, often being compared with that of the wild Strawberry. Cooper pro-duces its crop early in the season, and is especially adapted to fancy, local market trade, where its large size and attractive appearance result in quick sales at big prices. Is a splendid berry for table use, its wonderfully sweet flavor making it one of the best for sauce, shortcake, etc. Include some in your order.

Beaver

A recent origination from Wisconsin which has the ability to produce a crop of berries under conditions which would result in crop failure with some other varieties. Fruit is a deep glossy red throughout, firm, and can be left unpicked on the vines for days and remain in marketable condition. Hardy and frost resistant. A splendid shipper, as it stands the long hauls to market without damage.

Aroma

Is a steady producer of big, round, deep red, glossy berries of excellent eating qualities. The skin is tougher than the earlier varieties and the flesh is firm---the characteristics which make it such a splendid shipper. For a late variety, Aroma is unusually mild and sweet. It is a fancy berry in the truest sense of the word which greatly adds to its marketability at top prices. Home growers delight in its planting and the fruit that the plant bears. If you want a good late berry, perfect blooming, order some Aroma, as it is our standby in late varieties.

Brandywine

The Brandywine is a valuable late Strawberry especially adapted to home se and canning, owing to its very dark red color and fine flavor. Is well aped, good in quality and size, firm and very productive. It is strongly aminate, making it an excellent variety for mating with Sample and some

Pearl

A vigorous, perfect blooming plant, with tall fruit stalks heavily loaded with large to extra large berries. Color a medium red, somewhat like Gandy, only a little more dull, with large, yellow seeds on surface. These are extra late and come on the market when practically all other varieties are gone, and gommand highest prices. It is displacing the Aroma in a good many sections, and that is a first class recommendation, as Aroma has been the

"SPLENDID SHIPPING QUALITIES"

Cut Price Plants REAL VALUES

Per 1000 It has always been our custom to thoroughly clean out our pack-ing house every day during the shipping season, and as it is im-possible to dig the exact number of plants required to fill the day's orders, we frequently find that we have a surplus of some varieties. We also plant more of some varieties than the demand will con-sume and rather than destroy these plants we offer them to you at a very reasonable price. We cannot guarantee to supply any certain variety, but they will be one or more of the standard va-rieties that we have listed in our catalog, and whenever possible we will label those plants, true-to-name. Jf you are not particular about varieties, just want good Strawber y plants, this will enable you to plant a patch at a big saving.

When ordering, use the term: Cut Price Flants.

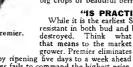

Some of Our Best Varieties of Strawberry Plants Per 1000

-

Grapes Are Good For a Lifetime

EASY TO GROW_VERY PRODUCTIVE The Grape is perfectly hardy and can be grown almost anywhere. It must have well drained soil, but it is not particular as to the kind of soil. They grow equally well in heavy clay, light sand or loam. Should be planted about 9 by 10 feet, requiring 485 plants per arce. Should receive regular timming, curting of all the new growth but four laterals, two each side of the main stalk, and these trellised on the wire so they nearly meet the laterals reaching from the next vine, making it one continuous line, one on each wire; no side shoots of any kind.

by the American Institute of New York. CAMPBELL'S EARLY. This Grape produces larger berries and bunches than any that we have grown. Quality and flavor the finest; sweet and fuicy. We recommend this variety for home use and high class markets. Ripens same time as Moore's Early. NIACMAR THIS IN THE COMPARENT AND A THIS IN THE AMERICAN AND A THIS INTERNA AND A

no side shoots of any kind. CONCORD. This is the standard of qual-ity and comparison on all markets. It is per-fectly hardy, very productive and will suc-ceed anywhere. The bunches are large and compact; berries large, bluish black color. Fo-liage healthy and tough, and hangs on very late. The one all-purpose Grape; we heartily recommend it for both home use and market.

WORDEN. Very hardy, healthy and market. worden in wigor and health, is surpassed by no other variety; is practically immune from fungous diseases, and a sure, heavy cropper. A few days earlier than Concord. Jet black.

Concord Grapes.

class markets. Ripens same time as Moore's Early. NIAGARA. This is the leading white Grape throughout the country. Berries large, yellowish green when ripe. The bunch is large and compact. Is vigorous and hardy, and fully as productive as Concord. Fine flavored.

Martha Washington Asparagus

This new variety that has been offered to the public for but a short time has been app test horticulturiate as the most rustresistant Annarasis group. It is not time has been app

been approved by the e quantities along the quality is found only helieve the Martha to nee that we could not

seacoast views grown, at is grown in large quantities along the seacoast view for statest success. The rust-resistant quality is found only in the Washington varieties, and of these we helieve the Martha so be the best. At least there is so little difference that we could not recommend any other as being better. This new pedigreed, nurversistant Asparagus is the result of breed-ing by the United States Bureau of Plant Industry which eco-operated with the Masachausta Agricultural Experiment Station in perfecting apriod of fourteen wonderful variety. These experiments covered a which they thought was the came of greetwood of meeting as sort which they thought was the came of greetwood the best and are listing it no only one aize, the two-year, which we consider to be the very best Asparagus buy in the country. Why let a few cens differ-ence in price keep you from having the best, both as to variety and size.

Apparque is grown anywhere-in your garden or any out of the way place-where the soil has good drainage. It should be cultivated the first two years, after that as mulci as all is an eccessary. Plant in early apring. Dig or plow a furth will be cultivated the first two years. After that as mulci as all the should be cultivated the early apring. Dig or plow a furth will be the should be cultivated with a layer of dirt. Place the crowns in this trenches and cover with a layer of dirt. Place the crowns in this trenches and cover three inches apart each way. but for field culture they about four them gradually until it become level. Aparagua may be planted to two feet apart in the row with the rows about four feet apart.

Rhubarb for Early Pies and Sauce

Rubarb should be grown in every garden, as it provides material for early spring pies and fresh table sauce. It is also valu-able for canning. Plant a free roots this spring and you will have a fresh supply of this early "fruit." This variety differs greatly from the old "pie plant," in that it has larger, more tender stalks and a milder sub-zeid favor. Our roots are strong and priced right. Include a few of them in your order this spring. LINNAEUS RHUBARB ROOTS. Strong, 2-year, 6 for 50c; 25 for \$2.00; 100 for \$6.00.

It Is Easy to Grow Strawberries With Dass' Plants

WHEN TO PLANT. The best time is some time during late March or April. We begin ship ing about March 20th or 25th, and plants are in fine dormant condition for about a month after that and may be safely shipped and planted any-where. Many inquiries come to us in regard to the set-ting of strawberry plants in August. The northern digging or shipping at this time. We have found that October setting is far more successful than in Au-gust and we are pleased to give you our method of fall Have your ref.

*

Everyone Should Plant an Orchard

Every land owner should plant at least a small orchard. The blossoms alone would more than repay for the trouble, even the sbade it might afford. The landscape effect it gives to the homestead is invalu-able, as no real homestead could be complete in appointment without its orchard; it's the one dear spot in the memory of everyone reared on the farm that has its orchards. Still some people neglect such an im-portant feature in laying out their home grounds, and with all these benefits you may have fruit fresh from the tree at your pleasure with a flavor that cannot be had in ones from a distant market. Could there be greater inducements for planting an orchard?

THERE IS A DIFFERENCE!

INEXE IS A DIFFEXENCE! In a good many nursery catalogs you will find trees listed at extremely low prices, and this is the reasoo. They are the so-called Mail Size trees, that are little, scrawny, one-year grafts or two-year runts, that in our opinion are unfit for planting. The biggest loss is in the growth, as plantings made with these are from one to three years behind in growth, when planted with standard size trees. Also, the little trees are so small and low-brancbed that it is practically impossible to trim them and have a good shaped tree with branches where they should be. We do not plant the small trees, do not recommend them and absolutely do not stock. The hog and cattle feeders have learned long ago that it is a pretty risky proposition to buy "runts," and we do not believe that any planter should let a few cents difference in first cost persuade him to plant any other than the high grade standard size trees that we offer.

Dass' Time-Tried Apples

In late years the cost of bringing an orchard of Apples into bearing has been materially reduced by using peach and other fillers in the orchard. The Apples are planted from 33 to 40 feet apart and the fillers between. These fillers to be removed in from 10 to 15 years. Any land that is well drained and not too dry will raise Apples, and the varieties we list are all time-tried and proven.

Prices of 5 to 6 ft. trees, all varieties: 30c each; 10 for \$2.50; 100 for \$23.00.

Summer Apples

YELLOW TRANSPARENT. This is the best of all early summer Apples; excellent for both cooking and eating. Fruit large, crisp, tender, juicy, mildly sub-acid. Skin yellowish white when ripe. Tree medium sized, vigorous, hardy and quick growing. It is excessively productive and bears at an early age. Brings top prices on all markets, and is excel-lent for home use.

Autumn Apples

Autumn Apples McINTOSH RED. A medium sized, deep crim-son Apple that is very beautiful. The tree is very hardy, vigorous, and quick growing. Will do well in all sections of the country. Plesh is pure white, tender, juicy and has a splendid flavor. In fact, we know of no fall Apple that is its equal. It originated in Canada and is, therefore, very hardy. Plant at least a few trees and have good Apples while win-ter Apples are ripening. These will keep in storage for several months.

WEALTHY. Large in size when full grown, and a good cropper. Fruit is red with light streaks. Qual-ity good, juicy, an excellent cooker and canner. Is a hardy tree, and a good, quick grower. Bears young.

Winter Apples

GRIMES GOLDEN. The nearest to perfection of aoy yellow winter variety now in general culti-vatioo. Is a large sized, golden yellow Apple, with extra fine flavor, and good keeping qualities. Tree a quick grower, and bears young. Don't fail to in-clude some in your orchard.

cuote some in your orchard. **STAYMAN'S WINESAP.** This Apple is now attracting attection everywhere as a profitable mar-let unity is a strategistic dull red color, great productiveness and best quality. The tree is a vig-orous grower and is irregular and drooping in habit, and adapts itself readily to different soils and climates.

BALDWIN. The great commercial late winter Apple. Tree a large, vigorous, open grower, up-right in tendency and very productive. Fruit large. rounded, deep red. Flesh juicy, crisp and rich.

This fruit brings returns sooner than any other tree that can be planted. It is very desirable also for use as a filler in Apple, Plum and Cherry orchards, because it comes into bearing so soon and makes the orchard show a profit before the slower growing trees reach their bearing age. They are usually planted from 15 to 20 feet apart in permanent orchards, and do best on light, well drained soil. Trees should be severely pruned when planted, allowing them to make new branches on the planted trunk.

UTH HAVEN. Our stock of South Haven was budded from hear-ing trees and they certainly are fine. This great variety has been outselling all early Peaches on the market for the past several years and we recom-mend it without heaitation as being an extra fine sort. Is large sized, free-atone, yellow fieth and a sin with red check; tree a quick, upright grower.

OCHESTER. This wonderful new , blushed with ted for both

whole country, d a strong growing, variety. Color yel-heek; fiesh yellow and i; freestone; skin ea-and will stand long Avored; freestone; skin ea-y tough and will stand long ts better than any other There are more acres of

Quince

Delicious Apple

DELICIOUS. No new variety has ever gained popularity in so many different Apple sections as the Delicious. Fruit extra large. A brilliant bright red; flesh fine grained, crisp and juky with a delight-ful aroma. Is of very highest quality. Tree one of the hardiest and a quick grower and bears young. R. I. GREENING. This is the old-fashioned Greening that sells readily at good prices on all markets. The best Apple for cooking purposes that there is grown, and also excellent for dessert use. Large in size; flesh firm, fine grained and crisp. Tree grows large and spreading; does well in any soil and climate.

climate. JONATHAN. A beautiful all-red Apple, me-dium in size, highly flavored, and of excellent qual-ity, being tender, juicy, spicy and rich. A splendid market and family sort. Tree long lived, productive and an early bearer. Wilk keep well without special care, and will stand much handling.

care, and will stand much handing. ______NORTHERN SPY. This is a fine Apple for culi-nary use and its exceptionally fine flavor makes it invaluable as a dessert Apple. Fruit extra large, firm, tender, crisp and juicy; mild sub-acid flavor. Skin pale yellow with bright pinkish red, and mottled with carmine. Tree large and vigorous.

with carmine. Tree large and vigorous. WINTER BANANA. Pruit large to very large. Skin smooth, moderately thick, color bright pale yellow, often with a blush, which in well colored specimens deepens to a dark pinkish red Flesh white, tinged with pale yellow, moderately firm. HYSLOP CRAB. Fine for jelly and pickles. Fruit large, skin smooth, color dark tred with bluish pur-ple bloom. The best Crab for general use and mar-ket. Tree a dense grower, much in use for orna-mental purposes.

ket. I ree a ueuse grows, and mental purposes. WAGENER. Roundish and medium size. Skin shaded and faintly striped with pale red on warm, yellow background, the shading deepening on sunny side; often streaked with russet. Flesh yellowish, fine grained, firm, fairly juicy, mildly sub-acid and of ex-cellent flavor. An Apple desirable for cooking use and also esteemed as a dessert Apple. Tree vigorous, comes into bearing at an early age.

ROME BEAUTY. Skin is thick, nearly covered with bright red on yellow ground, handsomdy col-ored. Flesh nearly white, slightly tinged with yellow or green, firm, moderately fine grained, rather crisp, juicy, aromatic, agreeably mild sub-acid, good qual-ity. Fruit stands handling remarkably well, is a good keeper and holds till late in storage.

Plant Peaches for Quick Returns

Extra fine, 5 to 6 ft. trees, the best size to plant: 25c each; \$2.00 per 10; \$20.00 per 100.

Elberta Peaches.

J. H. HALE. Fruit averages one-third to one-half larger than the Elberta; ripens about five days earlier and is much superior in favor. Color a beautiful golden yellow with car-mine bluak. Is only partially eff-pollenizing, so should be planted with pollenizing, so should be planted with

GOLD DROP. A

MAYFLOWER. This is our eadi-est Pesch and a dandy flavored, good sized Pesch. Flesh white; skin white with light earmine blush in sun. Is semi-cling but excellent for out-of-hand easing. Extensively planted for roadide stands, as it to bright and it wonkerfully attractive color sells

Apricot

ORANGE, We list only this one Quince, as we consider it the best by far. The trees commence to bear very young and produce big crops. Fruit is ex-cellently flavored, orange shape and of large size. Tree a dwarf grower, planted about 12 feet apart in orchards. PRICES: 4 to 5 ft. trees, 35c each; \$3.00 per 10; \$25.00 per 100.

Permanent Beauty for Your Home

American Arbor-Vitae

An evergreen of erect, broadly pyramidal babit, with off bright green foliage, dense from ground up, Grows rapidly, and soon forms a most beautiful tree for any purpose. In very hardy and dependable in any situation, although a moist location is preferred. Like other types of Arbor-Vitae, the American can be trimmed at will, or even closely sheared when sufficiently developed to present formal lines. Balled and burlapped, 2 to 3 ft. trees, twice transplanted, \$1.00 each; 2 or more, 75c each.

Globe Arbor-Vitae

Delightful Formality — Charming in the Border t is hard to find a more handsome evergreen than our Clobe Arbor-Vitac. In shape s absolutely round or globular, very dense in growth, and does not require abserting, foliage is a deep, dark green, flat and heautifully carved like all of the Arbor-Vitacs, fon does it get over 3% to 4 feet at maturity, hence its generous use in low borders foreground work. Our Clobes are beautiful specimens that give charming effects in cope planning. Balled and burlapped, 12x12 in. spread, twice transplanted, \$10.00 each;

Uniperus Chinewis Pfitzerians) This remarkable tree is today in the front rank of ornamental overgreena. Its great popularity is due to it ability to thrive in all parts of the country and under almost any conditions of soil or exposure. An important tree in the far South and also a perfect grower in extremely cold sections. One of the few evergreens that will stand considerable thade. Color is deer green, with a trayistic satis. Strong, vigorous type of foliage. Should be in every evergreen plantine. Balled and burlapped, 18 to 24 in cress, twice transplanted, \$1.25 each; 2 or more, \$1.00 each.

Irish Juniper

American Arhor-Vitae. An ecct and Aleader vergreen on the filler of the folge is decing green and vergreer compact. When matured, this tree reaches a height of six to seven feet, but it is never over one and on-chalf feet in diameter. Much used in centerty plannings, as well as in landcaping the bome grounds. Balled and burlapped, 18 to 24 in., twice transplanted, \$1.00 each; 2 or more, 75c each.

Norway Spruce

(Pirce Exceles) tree of open, pyramidal babit, exceedingly picturesque. Very popular in evergreen gle apecimens, Alao one of the best evergreens for hedges and much used for wind-pruce is one of the kinds most commonly used for Christmas trees. Balled and bur-, twice transplanted, \$1.00 each; 2 or more, 75c each.

Biack Hillis Spruce

(Pice variable) growth. The foliage, of a bright, frosh color, variable from green to hlush net. Being rather spreading in habit; it is used mainly for undividual appearment. For background borders, and in places away from buildings. However, it is a low growtr, so can remain in cheve quarters for several years, and is often seen in foundation plannings. Balled and hurlapped, 2 to 3 ft., twice trans-planted, \$1.25 each; 2 or more, \$1.00 each. Colorado Blue Spruce

Plums

In general, Plum ees thrive best in a

sandy or clayey soil, that is well drained.

They are usually plant-ed about 18 feet apart

in permanent orchards, or where a wagon sprayer is used about 20 feet. Many varie-ties of Plums produce so abundantly that the

Pears of Proven Varieties

Black Hills Spruc

The Pear tree will grow on almost any good soil, but thrives best in a rather heavy clay or loam. Soil should be well drained and kept under cultivation for best results. Standard varieties are planted about 18 or 20 feet apart for permanent orchards and the dwarfs about 10 feet. Dwarfs must be planted deep enough to cover the junction of Pear and Quince about two or three inches. Prices, 5 to 6 ft. trees, 30 ce each, \$2.50 per 10; \$23.00 per 100. BARTLETT. This is the most popular Pear, back foror. The wan market, that the world base ever known. It is buttery and rich with a bigh favor. The wan market, that the world when well winners in the results. SECKEL Often called the Sugar rear, as merry and huncheons. Tree makes a somewase invord Pears grown, always in demand for desserts and huncheons. Tree makes a somewase low, but stout and erect growth. KIEFFER. Sometimes known as Winter Bartlett, la a sure cropper, heavy yielder and has sceptional abapping qualities. While not of the best quality for out-of-hand cating, it is a layorite for canning and preserving. The early bearing, heavy cropping trees make it desirable

for quantity. DUCHESS DWARF. This is the king among the dwarf Pesrs, and the one that gives the most satisfaction to growers everywhere. Does not require much space for planning and bears enormous loads of high quality futii. When fully rise is a golden yellow, with a duil blush on the sunny side. When properly trimmed it does not grow over five or six feet high, which feature makes fit valuable for back-yard groten and city lost.

Cherries

Cherries succeed best in sandy or gravelly soil, but it must be well drained. The Sweet varieties grow more rapidly, and make more pyramidal trees. Sour varieties are more dwarf and can be planted about 18 fect apart in permanent orchards. Sweet Cherries should be planted about 24 feet apart. The roots and tops of Cherry trees should be severely pruned when planted, to secure best results.

CHERRY PRICES:

5-6 ft. trees, 30c each; \$2.50 per 10; \$23.00 per 100. EARLY RICHMOND. (Sour). This is the earliest and best your varrety, and a well known standard sort. Tree is bardy, wicrous and an upriphe grower. Is very productive and regular in bearing. Fruit a clear bright red, of medium site, acid, rich, and one of the best for canning and piet.

and one of the best for canning and pies. MONTMORENCY, (Sour). The finest sour Cherry grown. Is large, juicy, very bright red, acid. There is greater demand for this Cherge, the market than any other. The trees are the cleanest and by on the market mand are less subject to disease, wet weather and rot thours and are less subject to disease, wet weather and rot thours any other sour variety. Ripens about a week later than Richmond.

BING. (Sweet). Tree hardy and a strong grower, especially adapted to the East, although it came from Oregon. Fruit extra large, black, very fine and excellent for commercial purposes. BLACK TARTARIAN. (Sweet). Tree a vigorous, upright grower and immense bearcr. Fruit very large, purplish black, heart-shaped; flesh mild and sweet, and quality considered of the beat for market and dessert.

NAPOLEON (Royal Ann), (Sweet). Of fine appearance and very largest size, Color yellow and amber, with bright red publish, fleath firm, juicy and delicious. Profetable for market, inding a ready sale for canning and dessert. Bears enormous ropa.

SCHMIDT'S BIGAR-REAU. (Sweet). New., Remarkably bardy and productive. Fruit of largest size, a deep ma-bogany color; flesh dark, tender, juicy, very rich, excellent flavor. Stone small and separates essi-ly from fleah. WINDSOR. (Sweet). Canada. liver col-

Sturdy Bush Roses

SLUI UY BUSIN KOSES PRICE OF ROSE BUSHES: Heavy, well rooted, 2-year bushes, 30c each; 4 for \$1.00. FRAU KARL DRUSCHKI. The finest white Rose yet introduced. Sometimes called Snow Queen. Loved by all on account of the extra large, perfectly formed white Movers. (Hybrid Perpetual). GENERAL JACQUEMINOT. Fiery red, with magnificent form and color. A very good Rose for forcing and buds; also for garden culture. Very fragrant and the most popular red variety grown. (Hybrid Perpetual).

ind color. A very tagent and the most popular red variety grown. (Hybrid Perpetual). **MRS. AARON WARD.** Color deep golden orange, shading to creamy yellow. Semi-double bloom with deep cup shape. A profuse bloomer and the most desirable yellow sort. (Hybrid Tea). **PRESIDENT HERBERT HOOVER.** A wonderful new Hybrid Tea Rose that has become pollar over night. and of a beautiful globular form, which come on heavy individual ca the summer and until frost. Superb for cutting or for garden display.

Beautiful Flowering Shrubs

BUDDLEIA (Butterfly Bush). Commonly called Summer Lilac. Blooms very similar to lilac: commencing in late June and continuing until winter. Dies down in fall and produces new bush the following seasons. Branches attain a height of form 4 to 6 foct. Price, 2-yr. plants, 30c each; 4 for \$1.00.
BEUTZIA gracilis (Slender Deutzia). This is one of the handsomest of the dwarf shrubs and is unexcelled for edging shrubbery borders or for lowing growth. When in blossom in May it is a mass of white, the little bell-shaped white flowers clustering thickly along the branches and lasting for a long time. Will thrive in either sun or shade and is easily grown. Price, 2-yr. plants, 30c each; 4 for -100.

Deutzia Uracino. FORSYTHIA (Golden Bell). One of the earliest shrubs to bloom the earling. The long branches are covered with golden yellow Educe a dark green; grows well in the spring. The long branches are covered with golden yellow flowers before the leaves appear. Foliage a dark green; grows well in either sun or shade. Grows about 8 to 10 feet high. Price, 2-yr. plants, 30c each; 4 for \$1.00.

Buddlein

Ornamental Trees

CATALPA BUNGEI (Umbrella Tree). A very striking tree for formal planting. The low, spreading head is four to six feet from the ground, flat and rather roof-shaped, giving it the appearance of a green umbrella. Leaves are large and dense, deep green in color. One or two of these Catalpa Bungei, planted as specimens in front of the home or in the garden or border, give a delightful formal touch that can be at-tained in no other way. Requires no trimming unless its desired to keep the head to a ccrtain size. Hardy. Our Catalpa Bungei trees are extra select. Each, \$1.00, 2 for \$1.75.

BECHTEL'S FLOWERING CRAB. A low growing tree of exquisite beauty; makes the best appearance when planted as a single specimen in the lawn. From the middle of May until early June the branches are covered with bright pink blossoms, similar in appearance to a small rose. Price, 2-yr, trees. 60 each 2 (cr \$1.00. yr. trees, 60c each; 2 for \$1.00.

yr. trees, 60c each; 2 for \$1.00, ALTHEA (Rose of Sharon). We offer the tree form which is most desirable. Perfectly hardy and adapted to all soils; grows to a height of from 6 to 8 feet, the large, bell-shaped flowers are of many colors as to variety blooms during August and September when few other shrubs are flowering Price, 2-yr. trees, 50c each; 3 for \$1.35.

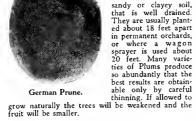

Price, 2-yr. trees, 30c each; 3 for \$1.55. CHINESE ELM. A new variety quite similar to the American Elm in appearance but much more rapid in growth, probably growing faster than any other shade tree. It attains great height and possesses a marvelous adaptability to soils and conditions which would be faal to other varieties. Well suited to arid sections and extreme temperatures. 8 to 10 ft., \$1.00.

RED JAPANESE MAPLE. One of the most satisfactory and ornamental trees for grouping in the landscape plan. Its finely divided blood-red leaves and graceful habit of growth make it very effective in almost any location. Price, \$1.75 each.

Price, \$1.75 each.
CAROLINA POPLAR. One of the most rapid-growing trees, with large, glossy, deep green leaves. Gives shade in a very short time. Succeeds everywhere. Especially adapted to cities, where it makes an unusually quick growth, and resists smoke and gas. Pyramidal in form, making a spreading head and dense shade when properly trimmed. Used in larger numbers for street planting than any other tree. 75c each.
LOMBARDY POPLAR. A tall, narrow, tapering tree of obelisk form, growing rapidly to a height of sixty feet or more at maturity. Always makes a striking feature in any landscape. Pine for planting in groups, along driveways, or to make boundary lines. Sometimes used for tall screen hedges.

st oo each

WEEPING WILLOW. Grows 30 to 40 feet tall. Makes a quick growth. The branches are olivergreen, slender, graceful, drooping nearly to the ground. Leaves long, narrow, smooth, silky green. It is fine as a specimen tree on the lawn alone. Its best situation is on the edge of streams or pools, natural or artificial, its branches near or drooping over the water \$1,00 each.

PLUM PRICES:

5-6 ft. trees, 30c each; \$2.50 per 10; \$23.00 per 100.

5.6 ft. trees, 30c each; \$2.50 per 10; \$2.500 per 100. ABUNDANCE, Frui Jarg, showy, beautiful amber turning to a rich, bright cherry-red color, with a decidedly white bloom, and highly perturned. Flesh light yellow, exceedingly juicy and tender, of a sweetness impossible to describe. Stono-small and parts readily from flesh. For canning it is of great-est excellence. Its season is very early, ripering in advance of other Pluma, thus adding to its value. BRADSHAW. A very large and fine early Plum; dark violet, red, juicy and good. Treas crett and vigoroum, very produc-tive; valuable for market. The quality is excellent, and it is often on quality and abipping properties make it sought for an article viriety. A trease and birb quality Plum, valued for

BURBANK. A very large and high quality Plum, valued for sa a mitket variety.
 BURBANK. A very large and high quality Plum, valued for esting and examine. Doos not stand abipping as well as some of the other sorts. Tree vigorous and hardy, hut sprawling in growth; need close prunning. Bornomously productive.

GARDENIA. Yellow climber. A most beautiful Rambler, beiog different from the Dorothy Perkins in color only. Flowers borne in large clusters of small, double blooms, and are very most correction. sweet scented,

DOROTHY PERKINS. A most beautiful shell-pink, and the thriftiest and showiest of all pink ramblers. Strong in growth; a profuse bloomer.

PAUL'S SCARLET. A wonderful Rose for trellis or pergola. Winner of Gold Medal as best new climbing Rose. Flowers are scarlet, shaded crimson. Blooms very long, holding its flowers after many June bloomers have dropped their petals.

Dorothy Perkins

Kolkwitzia-Beauty Bush.

SPIREA VAN HOUTTEI. Commonly called Bridal Wreath. This is the most popular of all shrubs. During May and June the branches are covered with a mass of flowers, and the dark green foliage gives a beautiful effect until winter. Thrives equally well in shade or sun. Plants attain a height of about five feet, and when in bloom are a mass of white, and never fail to attract attention. Price, 3-yr. plants, 3 to 4 ft., 15c each; 10 for \$1.00. KOREAN SPIREA. It is different from the other Spireas in that

INCLUSION SPIREA. It is different from the other Spireas in that the flowers are freely borne in dome-shaped clusters that see 3 to 5-inches across. It blooms about two weeks later than Spirea Van Houttei. The shrub grows as a compact spreading bush about 6 feet high and has glossy green foliage throughout the entire summer. Its extreme hardiness and magnificent bloom and attractive foliage make this a splendid shrub for every garden. Price, 25c each; 5 for \$1.00.

Hydrangea P. G.

High Bush Cranberry.

WHITE SNOWBERRY. Inconspicuous, rose colored flowers in June and July, followed by large, clustered milk-white fruits which remain far into winter. Bush is compact in form with numerous slender twiggy branches. Used in groups or large mass and border plasting.

Forsythia. Forsythia.

Hedge Plants

BARBERRY, Red Leaf. The new shoots of the plants that are planted in the sun are red, but the older leaves are what we would call a deep maroon-purple. It is beautiful and we do not think the coloring is equalled by any other shrub. The habit of growth and general characteristics are the same as the regular Japanese Barberry. Should be planted in the sun and not too close together for the best effect. Price, 2-yr. plants, 30c each; 4 for \$1.00.

Barberry that will pass inspection anywhere as being free from rust. Is a beautiful plant, very effective in hedge, group or single plantings. Foliage a brilliant green, tinted a reddish bronze. The branches are loaded with scarlet berries that are retained during winter. Price, 2-yr. plants, 15c each; 8 for \$1.00; \$10.00 per 100.

AMOOR RIVER PRIVET. This is the hardiest of all Privets and especially desirable for hedge planting in the northern sections. It is not subject to blight and the beautiful dark green foliage is retained until very late in the fall. May be trimmed to any shape. Price, 2-yr. plants, 10 for \$1.00; \$7.00 per 100.

Jananess Barberry Hedge

Spirea Van Houttei.

Hall's Japan Honeysuckle,

Hardy Climbing Vines

WISTERIA, Purple, Grafted. Do not confuse this with the common Chinese Wisteria which is much inferior to the grafted vines. One of the most elegant and rapid growers of all climbing vines. Has long, pendulous clusters of purple flowers in May and June and in autumn. Price, 2-yr. plants, 30c each; 4 for \$1.00.

AMERICAN IVY or VIRGINIA CREEPER. We are all acquainted with this wonderful climb-ing vine. Rich crimson in autumn. Very rapid grower, exceptionally fine for covering walls, ver-andas, trunks of trees, etc. Affords shade quickly. Price, 2-yr. plants, 25c each; 5 for \$1.00.

HONEYSUCKLE, Hall's Japan. A strong, vigorous vine, with pure white flowers changing to yellow. Poliage remains green well into the winter. Extremely fragrant and covered with flowers almost the entire season. Price, 2-yr. plants, 30c eacht 4 for \$1.00.

Each, 30c; 4 for 1.00. FLOWERING ALMOND

It Is Easy to Order From Dass

The express rate is one-third less than it was last year and for long distance shipping would advise your ordering by express, as advisability of shipping via express. If your orders for cane plants are ordered before April 1st, could ship them via freight, this also would save you money, but cannot ship via freight much later than April 1st, as it gets too hot.

WHEN TO ORDER: The sooner the better, and as a special inducement to have you send your order in early we will allow a 5% discount on all orders mailed before March 15th. This discount to apply only when cash accompanies the order. It is to our mutual advantage when you order early as it relieves us of office work during the rush season, and as our stock is complete you are certain to get what you want. No orders for spring shipment should call for shipment later than May 15th, as the plants are not dormant after that date, and we cannot be responsible for their condition after shipment.

HOW TO ORDER: Use order blank enclosed and be sure to fill it in correctly. We are anxious to give you prompt, efficient service and you can aid us greatly in doing this if you will write or print your name and address plainly and give the other information called for.

OUR SHIPPING SEASON: On all nursery stock begins about March 25th and continues to about May 15th in the spring. Fall shipping season from November 1st to November 30th or later.

TRANSPORTATION CHARGES NOT PREPAID. Our customers order from every state in the Union, and we cannot in all fairness quote a prepaid price. If we did, those of our customers living in our own or neighboring states would have to help pay the charges for those in far distant states. We ship all packages C. O. D. for carrying charges, whether by mail or express, and you can pay the mail man or express agent when plants are delivered. Specify whether mail or express shipment is wanted, or leave it to our judgment and we will ship the chargest way.

NO CHARGE FOR PACKING: We make no charge for wrapping and packing, which is done in the best possible manner by trusted men of long experience. Plenty of damp moss and shingle tow is used so that stock will reach you in perfect growing condition.

TERMS: Cash or one-third cash with order, balance before shipment or C. O. D. No credit shipments can be made, as our business is run on a strictly cash basis.

SUBSTITUTION: We do not substitute one variety for another without your permission, except on late orders when there is no time for correspondence. No varieties used for substitution except those listed in our catalog, and we guarantee satisfaction on varieties substituted.

IN CASE OF ERROR OR SHORTAGE: Notify us immediately as we are not satisfied until you are. As soon as you receive your order, check it over and if not correct notify us immediately, advising number of packages or crates short, accompanied by express agent's receipt for shortage if shipped via express.

Dewberries

These are a sort of blackberry, but the vines are not self supporting, as are the Blackberries. The usual method of propagation is as follows: They are set 3 feet in the row, rows 6 feet apart. Short posts are set about every fifth vine and a wire stretched about three feet from the ground. Each spring all strong vines are tied to the wire, and the ends that are too long are cut off about ten inches above wire.

LUCRETIA. This is the best variety of Dewberry that we have fruited and is one that gives universal satisfaction. Berries are very large, in fact, being larger than any blackberry grown. They are jet black, coreless, sweet and juicy. Dewberries are free from rust and all other fungous diseases. Plant at least a few for home use.

Lucretia Dewberries.

Currants

Fine for Jelly - Easy to Grow - Very Productive

The Currant is one of the most valued of small fruits. Being very hardy, they do not winterkill, are easy of cultivation, requiring little care.

PERFECTION. Cross of Fay's Prolific with White Grape and combines the best qualities of both parents. In color it is beautiful bright red and of a size larger than the Fay; the clusters average longer and the size of the berries is maintained to the end of the bunch. It is one of the most productive Currants we have ever known.

LONDON MARKET. A fine red Currant. Quality excellent with mild flavor. Bush healthy and vigorous.

Each, 15c; 10 for \$1.25; 100 for \$10.00.

We cannot ship Gooseberries and Currants after April 10th, as the law requires that they must be shipped when dormant. The State Inspector makes a spring inspection of Gooseberry and Currant plants, consequently orders should be in by April 10th to guarantee shipment. Downing Gooseberries.

Gooseberries

There's Nothing Quite Like the Pies and Preserves From Gooseberries.

Very profitable, for they are strictly for the North and require a cold climate; easy to plant and care for, and bring good returns. They require feeding, and when given a good mulch of stable manure in the late fall, will repay you well.

HOUGHTON. Small, dull reddish brown fruit, tender, juicy, sweet, and pleasant, ripening soon after midsummer. Profuse bearer.

DOWNING. Medium to large, pale green. Quality good. Upright, productive bush. Midseason. The most widely grown variety.

Each, 15c; 10 for \$1.25; 100 for \$10.00.

Perfection Currants.
